

MRO Training Topics

For Maintenance Fitters, Electricians and Machine Operators

- Introduction to 5S and TPM (Autonomous maintenance)
- Bearing maintenance
- Alignment and levelling
- Balancing and Vibrations
- Mechanical Drives (Gears, Chain drives Belt drive, coupling etc.)
- Lubrication practices
- Assembly/ Disassembly procedures
- Fits and Tolerance
- Pneumatic and Hydraulic system Fault diagnosis and repair
- Introduction to Electrical Control System
- Introduction to PLC control system
- Any Other topic as per requirement

For Supervisor and Engineers

- Vibration Analysis (Predictive Maintenance)
- Thermography (Predictive Maintenance)
- Oil Analysis (Predictive Maintenance)
- Ultrasound technologies (Predictive Maintenance)
- Work Standards and precision Maintenance.
- Root Cause Analysis
- Elements of Maintenance Planning and Scheduling
- Spare Part Management and inventory optimization
- World Class Maintenance Management
- Any Other topic as per requirement
